DETAILED ACTION

Remarks

1. The current claims are identical to the claims set forth in the application 10/278,199 (Abandoned). Thus, the Office Action mailed February 4, 2003 is repeated below.

Specification

2. The disclosure is objected to because of the following informalities: The amendment to the specification inserting the continuation data is incorrect. The section "Related Applications" in the Specification does not include application 10/278,199 or 09/324,749. Additionally, only the status of 08/907,429 is given. The status of all applications must be set forth in the continuation data.

Appropriate correction is required.

Double Patenting

3. A rejection based on double patenting of the "same invention" type finds its support in the language of 35 U.S.C. 101 which states that "whoever invents or discovers any new and useful process ... may obtain a patent therefor ..." (Emphasis added). Thus, the term "same invention," in this context, means an invention drawn to identical subject matter. See *Miller v. Eagle Mfg. Co.*, 151 U.S. 186 (1894); *In re Ockert*, 245 F.2d 467, 114 USPQ 330 (CCPA 1957); and *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970).

A statutory type (35 U.S.C. 101) double patenting rejection can be overcome by canceling or amending the conflicting claims so they are no longer coextensive in scope. The filing of a terminal disclaimer cannot overcome a double patenting rejection based upon 35 U.S.C. 101.

Claims 16, 17 and 19-23 are rejected under 35 U.S.C. 101 as claiming the same invention as that of claims 16, 17 and 19-23 of prior U.S. Patent No. 6,019,473. This is a double patenting rejection.

Art Unit: 2851

4. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 1-15 and 18 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-5 and 18 of U.S. Patent No. 6,019,473. Although the conflicting claims are not identical, they are not patentably distinct from each other because the sole difference between the Patent claims and the outstanding claims is that the Patent claims recite, "wherein the frames of the film are recentered with respect to the aperture each time there is a change in the film format." It would have been obvious to one of ordinary skill in the art at the time of applicant's invention have been obvious to add the quoted limitations to the outstanding claims. One would have been motivated to add the limitation to the outstanding claims in order to obtain a usable apparatus, as non-centered images would be difficult, if not impossible, to watch.

Conclusion

5. This is a continuation of applicant's earlier Application No. 10/278,199. All claims are drawn to the same invention claimed in the earlier application and could have been

finally rejected on the grounds and art of record in the next Office action if they had been entered in the earlier application. Accordingly, **THIS ACTION IS MADE FINAL** even though it is a first action in this case. See MPEP § 706.07(b). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no, however, event will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
